Professional Experience

Valantic India

Bhopal, Madhya Pradesh

Senior Front-End Developer/ UI/UX Designer

March 2022 - Present

Responsibility	<ul style="list-style-type: none">• Design and develop user interfaces following OutSystems UI and UX best practices• Translate business requirements and user stories into intuitive, user-centric screen designs• Modify and refine screens based on evolving business needs and design artifacts (Figma)• Ensure visual consistency, usability, and accessibility across web and mobile interfaces• Design and implement Progressive Web App (PWA)-friendly layouts, interactions, and logic• Collaborate closely with product owners, business analysts, developers, and QA teams to ensure alignment• Maintain consistency with design systems, style guides, and branding standards• Optimize front-end performance, responsiveness, and cross-browser compatibility• Validate designs through reviews, feedback cycles, and usability considerations• Support integration of front-end components with backend logic and services• Participate in design discussions, sprint planning, and cross-team coordination• Contribute to UI documentation and reusable components to improve design efficiency and scalability
Projects	<p>Equipment Repair Tracking System for Electronic Device Supplier in Switzerland. The Equipment Repair Tracking System is a responsive application developed for an Electronic Device Supplier in Switzerland to efficiently manage and track equipment repair processes. The system enables users to monitor repair status, manage service workflows, and access device information in real time. Designed specifically for tablet and mobile platforms, the application delivers a clean, intuitive user interface built using OutSystems, following Figma designs to ensure consistency, usability, and a smooth user experience across devices. Worked as a Front-End Developer, creating clean and responsive UI designs by following Figma specifications to ensure visual consistency and usability.</p> <hr/> <p>Employee Management System in Netherland. The Employee Management Application was developed for a Laboratory in the Netherlands to efficiently manage employee records, roles, and daily workforce operations. The system centralizes staff information, supports role-based access, and improves administrative efficiency through a clean, user-friendly interface. Front-End Developer for a tablet-based Employee Management application, designed with a user-friendly UI to ensure easy and efficient user interaction in a medical laboratory setting.</p> <hr/> <p>Shipping Management System for Chip Manufacturer in USA. The Shipping Management System was developed for a Chip Manufacturer in the USA to manage and track shipment operations efficiently. The system improves visibility, accuracy, and coordination across the shipping process. Designed and implemented clean, user-focused interfaces as a Front-End Designer, closely aligning with Figma design standards.</p> <hr/> <p>Travel & Expense Management System. The Travel Management System is designed to streamline corporate travel processes by managing travel requests, approvals, bookings, and expense tracking. The system improves efficiency and visibility while providing a user-friendly interface. Worked as a Front-End Designer on the Travel Management System, creating clean and user-friendly interfaces to support travel requests, approvals, and expense management.</p>

Responsibility	I worked as an Application Analyst at Accenture. In this role, I was responsible for analyzing application requirements, supporting development and maintenance activities, and ensuring optimal system performance. I collaborated with cross-functional teams to troubleshoot issues, implement enhancements, and deliver reliable application solutions aligned with business needs.
Projects	<p>Enterprise Application for Pharma & Lab Operations in Switzerland</p> <p>This is Pharmaceuticals and Diagnostics project for a Swiss client as an Application Analyst, where I supported the analysis, enhancement, and maintenance of business-critical applications. My role involved understanding domain-specific requirements, coordinating with cross-functional teams, and ensuring applications aligned with regulatory and quality standards. I contributed to improving system usability, data accuracy, and workflow efficiency, helping deliver reliable and compliant digital solutions for pharmaceutical and diagnostic operations.</p>

Madhya Pradesh Agency For Promotion Of Information Technology (MAP_IT)

Bhopal, Madhya Pradesh

Front-End Developer

Nov 2017 - June 2021

Responsibility	<p>I worked at MAP (IT), a state government organization, as a Front-End Developer, contributing to the digitalization of government policies through the design and development of responsive, accessible web applications for public-sector platforms.</p> <p>I built and maintained front-end interfaces using HTML5, CSS3, JavaScript, jQuery, Angular, and React, following web accessibility standards (WCAG) to ensure inclusive, usable experiences for all users. My work focused on high performance, cross-browser compatibility, and usability.</p> <p>I collaborated closely with backend, data, and domain teams to present real-time data through intuitive user interfaces and visual components. Additionally, I supported data visualization and multimedia requirements using Adobe Photoshop, Illustrator, After Effects, and Premiere Pro, helping communicate complex information clearly and effectively.</p>
Projects	<p>Tribal Affairs and Scheduled Caste Welfare Management Systems for Madhya Pradesh State Government.</p> <p>Tribal Affairs and Scheduled Caste Welfare Management Systems to streamline the management of welfare programs, monitor beneficiary records, and track policy implementation.</p> <p>The systems provide an intuitive interface to manage data efficiently while ensuring transparency and accuracy in government operations.</p> <p>Worked as a Front-End Designer on this project, also handling graphic design tasks to create a visually appealing and user-friendly web application.</p> <hr/> <p>Tour & Tourism Management System for State Government.</p> <p>Worked as a Front-End Designer on this project, also handling graphic design tasks to create a visually appealing and user-friendly web application.</p> <p>This project is a government-backed tour and travel management platform developed to support Madhya Pradesh Tourism. It enables centralized management of tourism destinations, tour packages, bookings, and hotel accommodations under the state hotel industry.</p> <p>The system streamlines travel planning for tourists while providing administrators with efficient tools to manage content, availability, and operations, ensuring a smooth and reliable user experience.</p> <hr/> <p>RERA (Real Estate Regulation and Development Act) for Madhya Pradesh State Government.</p> <p>As a Front-End Designer on the RERA project, I focused on creating accessible, responsive, and user-friendly interfaces for a government platform managing large volumes of real estate data.</p> <p>The design follows accessibility best practices to ensure usability for diverse users, including clear typography, proper color contrast, and intuitive navigation.</p> <p>Responsive layouts were implemented to deliver a seamless experience across desktop, tablet, and mobile devices. Special attention was given to information architecture and data presentation, enabling users to easily browse, search, and manage large datasets efficiently without compromising performance or clarity.</p>

Responsibility	I worked as a Front-End and Web Designer, where I was responsible for designing responsive, user-friendly websites and interfaces. My role included creating and customizing WordPress themes, ensuring consistency between design and development. Alongside web design, I also contributed to logo design, animations, and graphic assets, supporting brand identity and visual storytelling across digital platforms.
Projects	<p>Property Snagging and Inspection management system in UAE. This mobile application is designed to manage the Snag Management System efficiently across the UAE. It provides a digital platform for real-time monitoring, tracking, and administration, ensuring smooth operations and enhanced productivity. Worked as a Front-End Designer on this project using cordova and onsenUI, also handling graphic design tasks to create a visually appealing and user-friendly web application.</p> <hr/> <p>Working on online real estate platforms for Dubai. I worked on online real estate platforms for the Dubai market, contributing to the design and development of user-friendly, responsive web interfaces. My role included designing and customizing WordPress themes for blogging platforms, followed by creating reusable themes and UI components in Laravel for real estate developer platforms. The focus was on clean design, scalability, and performance, ensuring smooth user experiences across devices and data-heavy real estate listings.</p>
